

Internship Block 2018-19

TDChristian High School is excited to again offer four-period Internship Blocks. They consist of two in-school credits and two co-operative education credits. Internship Block engages students in learning and helps them relate what happens in their co-op work place to their learning in school. Furthermore, students learn to serve others especially through their co-op placements and the related projects they complete in school.

The credits that make up Internship Block are:

- A Science or English (likely Chemistry (SCH3U, SCH4C) or English (ENG3U/C, ENG4U/C))
- Manufacturing Technology (TMJ3M/C/E) or other approved credit
- Two co-operative education credits (one which qualifies for the TDChristian Diploma)

Grade 11 Internship Block students fulfill the Grade 11 Perspectives requirement as the block will especially look at the place of work in the light of God's Word. Mathematics and, depending on the semester, Science or English are the only Grade 11 requirements students need to fulfill in the other semester.

Grade 12 Internship Block students fulfill the Grade 12 Perspectives requirement. So taking the block covers the two required Grade 12 courses, if English is included.

What does a typical week look like? On Monday, Wednesday and Friday students are at school under the direction of the teachers (this year it was Mr. Godber and Mr. Sjaarda). On Tuesday and Thursday students are at a co-op workplace they find.

Interested in learning more about this block? Talk to Mr. Godber, Mr. Sjaarda, or your guidance counsellor.

If you wish to apply for Internship Block, fill in the form below and return it along with your course selection sheet by the designated deadline. Write any questions/concerns on the reverse.

Name: _____ Applying for: Grade 11 Grade 12

#1. State the two main reasons you are interested in Internship Block.

#2. Check the areas that would interest you for a co-op job.
