

1.5 Graphing Lines

Sketch the graph of each line using the slope (m) and y-intercept (b).

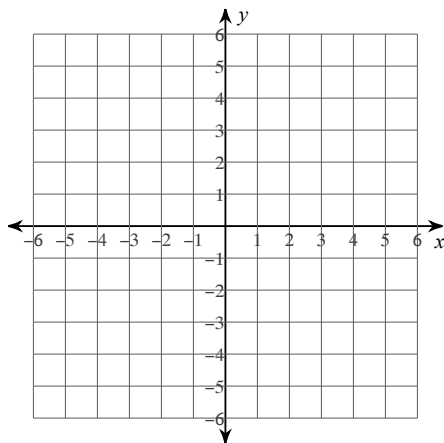

1) $y = 2x - 3$

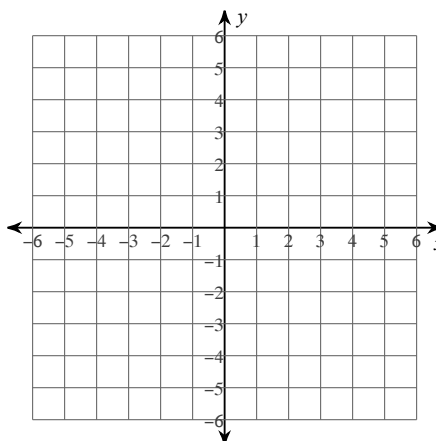

2) $y = \frac{1}{4}x + 2$

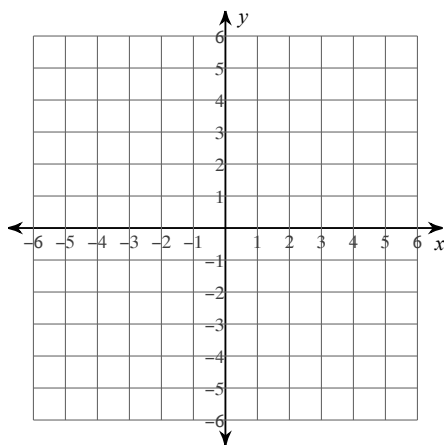

3) $y = -2x - 4$

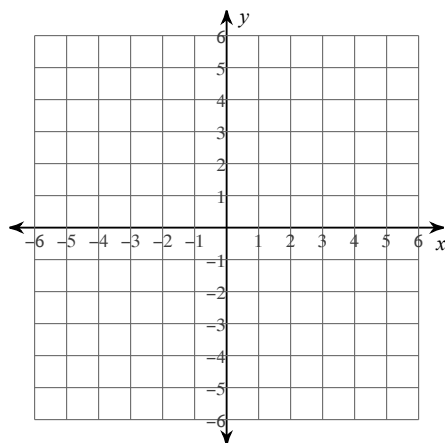

4) $y = -\frac{1}{3}x$

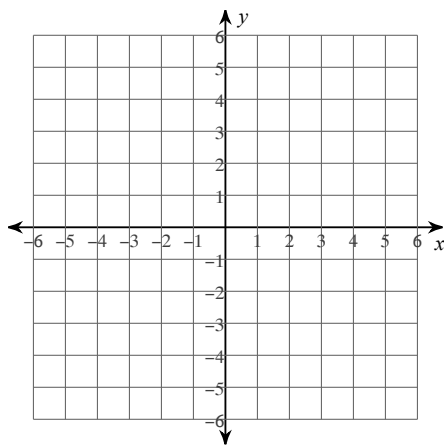

5) $y = x - 2$

6) $y = -\frac{3}{4}x - 3$

7) $y = -x$

8) $y = \frac{2}{5}x + 2$
