

**Lesson 6.3 cont.. Finding missing slopes**

1.  $(2, y)$  and  $(-3, -2)$ ; slope:  $\frac{3}{5}$

**Now your turn:**

3.  $(2, y)$  and  $(7, 2)$ ; slope:  $\frac{7}{5}$

2.  $(x, 4)$  and  $(-5, 10)$ ; slope:  $\frac{3}{2}$

4.  $(x, 9)$  and  $(7, 6)$ ; slope:  $\frac{3}{5}$

**Success Criteria**

- I can find a missing coordinate, if given the slope
