Measurement Word Problems

Therefore
diagram

All word problems need to have a ~~use a ruler~~ statement.

They must also always include the width when working with measurement.

$$P = 36 \text{ cm}$$

$$P = 2l + 2w$$

$$P = 2l + l$$

$$P = 3l$$

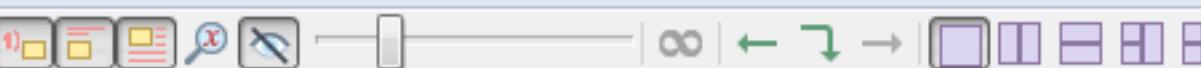

The length is 12 cm and the width is 6 cm

$$W = \frac{l}{2}$$

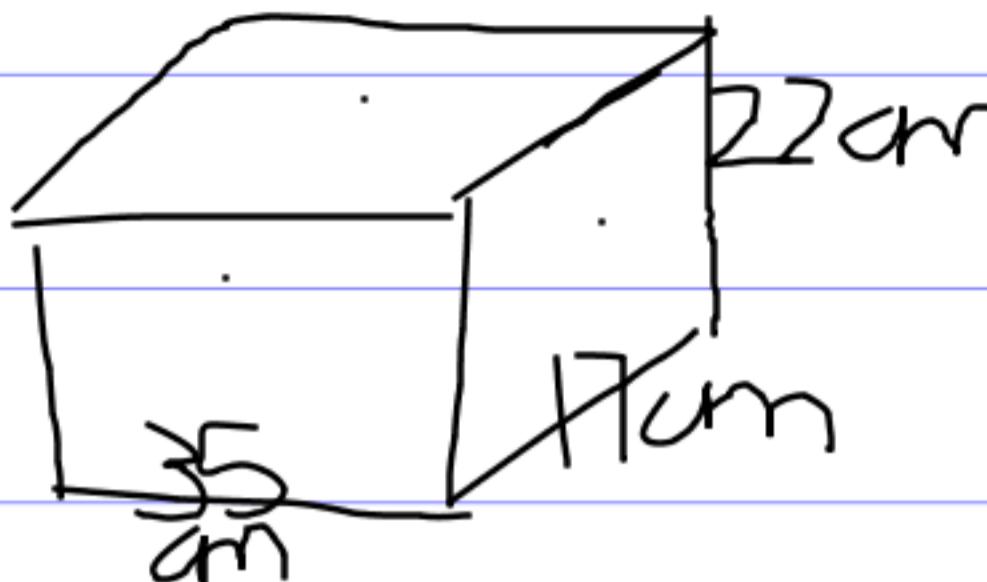

$$W = \frac{12}{2}$$

- 24) Suppose that the perimeter of a rectangle is 36cm and the length is twice the width. Find the dimensions of this rectangle and what is the area?

Show

25) Danny's new fish tank measures 35cm long, 17cm wide, and 22cm high. What is its surface area?

$$SA = 2(wh + lw + lh)$$

$$SA = 2 \left((17)(22) + (35)(17) + (35)(22) \right)$$

$$l = 35 \text{ cm}$$

$$w = 17 \text{ cm}$$

$$h = 22 \text{ cm}$$

$$SA = 2 \left[374 + 595 + 770 \right]$$

$$\begin{aligned} &\text{The surface area formula is } SA = 2(lw + lh + wh) \\ &SA = 2(17 \times 35 + 17 \times 22 + 35 \times 22) \\ &SA = 2(595 + 374 + 770) \\ &SA = 2(1739) \\ &SA = 3478 \text{ cm}^2 \end{aligned}$$
