

p. 121

Real Numbers Sept. 10

1a) Rational Number

$\frac{1}{2} = 0.5$ can be expressed
as a terminating decimal

d) $\frac{-3}{0}$ error

division by zero
is impossible.

e) $\frac{-0}{4} = 0$

$$h) \sqrt{5} = 2.236067978$$

Irrational Number - in decimal form, there is no pattern and... the decimal keeps on going
