# Grade 12 Course Selections – TDChristian High School

## Instructions and Course Options for 2023-24

The process of using *myBlueprint* for course selections is closed. At this point in the year, students who wish to make course selections for next year need to complete and submit BOTH sides of this page.

Course descriptions can be found in our *Course Calendar*, located under Course Info.

### COMPULSORY COURSES:

Every Grade 11 student will take the following compulsory courses next year: English, Math, and Families in Canada.

Please select (✓) which of the following courses you wish to take next year for English and Math.

English**	
College (ENG4C)	
University (ENG4U) – need ENG3U	

\*\* the course you select for English will determine which Families in Canada course you are put in (HHS4U or HHS4C)

Mathematics	
College (MAP4C)	
Data Mgt (MDM4U) – need MCF3M or MCR3U	
Functions (MHF4U) – need MCR3U	
Calc. & Vec. (MCV4U) – must also take MFH4U	
No Math – don't need it for future plans	

### ELECTIVE COURSES:

In addition to the above compulsory courses, students will take 5 elective courses next year. The selection of those courses is done by following the instructions on the back of this page.

SCIENCE NOTE: All students attending TDChristian need to take at least one senior level (grade 11 or 12) Science course. For all university level Science courses (except SES4U), students must take the Grade 11 course before taking the Grade 12 course. This is not the case for college level, as in Ontario there is only one grade level for each subject

After completing both side of this page, please have this sheet signed by a parent or guardian and then submit this form to the office, or send a scanned pdf copy to [schedules@tdchristian.ca](mailto:schedules@tdchristian.ca)

Please include any notes that may be helpful as we plan classes (i.e. attending summer school for . . . , post secondary goals, IEP information, any online courses you wish to take, etc)

**Elective Course Offerings:** Below is a list of all the elective course options being offered next year. Select **9 courses** and then rank them 1 through 9 (#1 being the course you need/want the most).

Course selections are used to design next year's timetable. Whether or not the courses listed below will run next year depends on student interest and teacher/room availability. Ideally you will get your top 5 picks, but that does not always happen, so you are asked to pick extra courses just in case.

Discipline	Course (credit)	Rank
Arts	Music	Music (AMI3M/4M)
		Guitar (AMG3O)
	Visual Arts	Photography (AWQ3M/4M)
		Visual Arts (AVI3M/4M)
